**TITLE** Classification of Educational Systems in OECD Member Countries: Finland, Germany, Japan.  
**INSTITUTION** Organisation for Economic Cooperation and Development, Paris (France).  
**PUB DATE** 72  
**NOTE** 76p.  
**EDRS PRICE** MF-\$0.65 HC-\$3.29  
**DESCRIPTORS** \*Comparative Education; Statistical Data  
**IDENTIFIERS** \*Educational Systems; Finland; Germany; Japan

### ABSTRACT

This volume is one of a series intended to provide a comparative view of the education systems of all the member countries of the Organization for Economic Co-operation and Development (OECD). The purpose of this work is to assist OECD member countries in the development of their educational statistics so that published national data can be readily converted on the basis of a standardized system. In this context, the OECD Council has indorsed this present volume "as a suitable framework for the compilation of comparable educational statistics." In order to facilitate the use of the conversion key for the comparisons of the three educational systems included in this work, definitions of terms used in the OECD classification are listed in the first section. This section is followed by a series of charts for Finland, Germany and Japan, each with the following identical headings: 1) Type of Education or Institution; 2) Length of Study; 3) Entrance Requirements; 4) Certificate; 5) Full/Part Time; 6) Other Information; 7) OECD Classifications for Type of Education; and 8) OECD Classification for years of study. Data has been collected and arranged according to these headings. A bibliography is also included for each of the three nations. (FDI)

**ORGANISATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT  
PARIS 1972**

*The Organisation for Economic Co-operation and Development (OECD) was set up under a Convention signed in Paris on 14th December, 1960, which provides that the OECD shall promote policies designed:*

- to achieve the highest sustainable economic growth and employment and a rising standard of living in Member countries, while maintaining financial stability, and thus to contribute to the development of the world economy;*
- to contribute to sound economic expansion in Member as well as non-member countries in the process of economic development;*
- to contribute to the expansion of world trade on a multilateral, non-discriminatory basis in accordance with international obligations.*

*The Members of OECD are Australia, Austria, Belgium, Canada, Denmark, Finland, France, the Federal Republic of Germany, Greece, Iceland, Ireland, Italy, Japan, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, the United Kingdom and the United States.*

## INTRODUCTION

The present volume is one of a series intended to provide a comparative view of the education systems of all OECD Member countries. It is a complement to the earlier OECD "handbook" for educational planners: Methods and Statistical Needs for Educational Planning which was published in 1967; one of the conclusions of which was the need to establish a "conversion key for all OECD Member countries so that published national data can be readily converted on the basis of the standardized system" as proposed in the above publication\*.

The purpose of both the "handbook" and this classification is to assist OECD Member countries in the development of their educational statistics and to provide a basis for the collection of internationally comparable statistics.

In fact, although education is first and foremost a national concern, the problems experienced in the development of educational systems are often similar in a number of countries. For this reason, it may be useful to compare different countries' solutions to specific problems. But for such comparisons to be valid, they must be based on common terms of reference; the statistics must, insofar as possible, have the same meaning in the various countries concerned.

For the statistics published by national authorities to be used as a basis for inter-country comparisons, a classification system and a set of definitions must be adopted which are acceptable and applicable to all the countries interested in making such comparisons.

Efforts have been made in various OECD studies to publish statistics on as comparable a basis as possible; no classification of education systems in their entirety has yet been established. The preparation of such a classification for OECD Member countries was included in the programme of the Committee for Scientific and Technical Personnel which has recently been replaced by the Education Committee.

\* This publication was endorsed by the OECD Council "as a suitable framework for the compilation of comparable educational statistics".

The "handbook provides the basic analytical framework and rationale for the classification; the present study shows in detail how the different parts of each country's education system are related to the reference frame in the "handbook". It is intended to be a guide to anyone who wishes to compare or understand the structure of the education system in OECD Member countries.

To establish a conversion key for the different countries, we have to start with the national classification of each country; in principle, only those types of education or institutions which are explicitly treated in national statistics are included. The degree of detail in published statistics varies enormously from country to country, and this explains the divergence in the size of the entry for different countries in these volumes. Where appropriate, and when the information was available, other types of education have also been mentioned.

The next step was to compile maximum information on these different types of education so as to assess them qualitatively. The evaluation criteria included length of studies, admission requirements (i. e. previous schooling), qualifications conferred and the possibility of transfer to other types of education, organisation of studies on a full-time or on a part-time basis, and any other information of possible interest to potential readers.

On the basis of this information, each type of education or institution has been reclassified under the OECD system, both from the standpoint of standardized designation and in terms of its position on the educational ladder by year of study.

Since education is now being extensively reorganised in many countries, the present study attempts to present the existing situation but also to give an indication of changes which have occurred during the past ten years.

While the present classification is valid for the situation at the date mentioned for each country, it may no longer hold for the new educational structures and concepts towards which some countries are already moving: for example, the discontinuance of the notion of levels and grades, continuing or recurrent education, etc. These changes will be taken into account in future revisions of this classification.

Since educational statistics in most countries are still cast in a national mould which reflects traditional administrative needs, it is hoped that this conversion key may help to promote a better mutual understanding of the systems in the different countries, permit the compilation and presentation of comparable statistics and enable each country to identify easily what is covered by each aggregate presented in a particular study.

This classification was prepared for all OECD Member countries by the Directorate for Scientific Affairs of the OECD Secretariat on the basis of available information and was subsequently submitted to the appropriate national authorities for verification and approval. Responsibility for the work in the Secretariat was with Monique Solliliage of the Educational Investment and Development Division, assisted by Randolph Quenum, James Steel and Arne Isachsen.

## DEFINITION OF TERMS USED IN THE OECD CLASSIFICATION\*

This is a classification by type of education and not by institution providing education. In fact, pupils of the same institution may, depending on the section or options chosen, take a general or vocational course, a course preparing them for higher studies, or a terminal course. Only the different types of education are suitable for inter-country comparison. A case in point is that of the universities: as educational institutions they may provide, in addition to courses leading to the officially recognised first university degree, courses of shorter duration leading to qualifications below first-degree level and comparable to those awarded by higher education institutions not having university status. Conversely, non-university institutions may award the equivalent of a university degree.

### Pre-primary

Non-compulsory education preceding entrance into primary education.

### Primary

Compulsory general education for all pupils. In systems providing a comprehensive-type education for all pupils which covers all or part of their compulsory schooling, only those years in which there is no differentiation (in the form of subject options) have been regarded as primary education.

### General secondary

Education which is not direct preparation for an occupation.

### Technical secondary

Education designed as direct preparation for an occupation or trade.

\* For further details of this classification, the reader is referred to Chapter IX of Methods and Statistical Needs for Educational Planning, OECD, 1967.

### Secondary (a)

General or technical education offers pupils, upon completion, a relatively good chance of continuing their studies in a higher education establishment.

### Secondary (b)

General or technical education, after which pupils have little chance of continuing to higher education.

This separation of secondary education into types (a) and (b) seems preferable to the frequently-used division into lower and upper levels or 1st and 2nd cycles because in more and more cases the lower level is common to all pupils (although sometimes composed of different sections) and only at the end of this period do pupils receive final guidance and make definitive choice concerning their future schooling.

### Teacher training

Preparatory training for the teaching profession.

### Non-university type higher education\*

Higher education leading to a specific qualification, often occupational and, unlike the first university degree, generally not offering the possibility of pursuing doctorate or other post-graduate studies.

### University type higher education\*

The length of the different types of education varies from country to country. It was therefore considered advisable to specify the corresponding years of study in the educational scale so as to permit any regrouping necessary for inter-country comparisons.

\* Where it has not been possible to make the distinction between non-university higher education and university higher education as defined here, the level of the degree awarded at the end of the different types of studies has been specified: below first-degree level, intermediate diploma (usually preparatory to first degree), first or basic degree, higher degree (above first degree), doctorate.

# **FINLAND**

(June 1971)

Compulsory schooling: 9 years, from the age of 7 to 16

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	G.E.C.D. Classification	
						Type of Education (7)	Years of Study (8)
1. <u>Pre-primary education</u> 1.1. Lastentarhat (Pre-primary schools)	3	Age : 3 years		Full time: 9-10 h. a day. Part time: 4 h.	The children are divided into age groups. Nursery schools run by the local authorities are free of charge in general and those run by private ones always fee paying.  From their first year, pupils in both primary and secondary schools receive marks at the end of the 6 terms for every subject taught, as well as for conduct, attendance and discipline. Obtaining poor marks, the pupil may have to stay one more year in the same class. The primary schools are municipalised, receiving State subsidies, on an average 70-80 per cent of the running costs.	Pre-primary	-
2. <u>Primary education</u> Kansakoulut (Primary schools)	6-7	Usually the child starts school at 7, but provided he passes an aptitude test he may start at six.	Primary school leaving certificate. The pupil may start secondary school after 4-6 years in primary school.	Full time	The regular primary school is divided into : a lower stage 1-2 (or 1-3) and an intermediate stage 3-6 (or 3-7 or 4-7).	Primary	1-6 or 1-7
2.1. Varsinaiset kansakoulut (Regular primary school)	6-7	Usually the child starts school at 7, but provided he passes an aptitude test he may start at six.	Primary school leaving certificate. The pupil may start secondary school after 4-6 years in primary school.	Full time	The regular primary school is divided into : a lower stage 1-2 (or 1-3) and an intermediate stage 3-6 (or 3-7 or 4-7).	Primary	1-6 or 1-7
2.2. Kansalaiskoulut (Primary continuation school or civic school)	1-3	Finished regular primary school	Certificate stating that the pupil has finished 8 years at school. No special final exam. This certificate gives access to vocational schools.	Full time	Usually the pupil stays 6 years in the regular primary school, followed by 2 years in civic school. Often a 9th voluntary year is offered. The main sections are : handicraft, domestic science, commercial, agricultural and technical.	General secondary (b)	7-8

## FINLAND

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/ Part Time (5)	Other Information (6)	O.E.C.D. Classification	
						Type of Education (7)	Years of Study (8)
2.3. Peruskoulut (basic schools)	9			Full time	In 1967 the Government introduced a bill which set out the framework of a new basic school of comprehensive type which should be completed all over the country within 16 years. This school will replace the present primary school and the first cycle of secondary school (intermediate school). The new basic school shall consist of 6 years junior level and 3 years at senior level.	General Secondary (a)	1-9
1st cycle	6						
2nd cycle	3						
3. General Secondary education 1st cycle or short courses	5	After four years in primary school	There is no special examination but each pupil receives a diploma stating that he has completed the first stage of his secondary education (intermediate school). This gives access to the gymnasium and to certain technical and professional colleges.	Full time	They belong administratively to the primary schools and are non-fee paying. One compulsory and one optional subject can be added to the curriculum - giving possibilities of concentrating studies on a group of related subjects.	General Secondary (a)	5-9
3.1. Kunnalliset Keskikoulut (1st cycle secondary school or intermediate school)	3-4	After six years in primary school					7-9/10
4. General Secondary education 2nd cycle or long courses	8	After 4 years in primary school a general examination must be passed. This exam, which is the same throughout the country, together with the candidate's primary school record and	The matriculation consists of two certificates: certificate awarded by the matriculation Board and the secondary school leaving certificate, issued by the school.	Full time	There are more private schools than State schools, both types are under the supervision of the National Board of Schools, and the same curricula are followed. At the State school as well as at the private ones, fees must be paid, but for families with financial difficulties tuition is free of charge. In many State schools the classes are mixed but there are also separate	General Secondary (a)	5-12 5-9 10-12
4.1. Oppikoulut (General secondary schools) - Keskikoulut or 1st cycle - Lukiot or 2nd cycle	5 3

		the teacher's report, determines the pupil's future schooling.	After 5 years the intermediate school certificate is obtained and many pupils leave the school.		schools for boys as well as for girls. The private schools are usually mixed. Usually the general secondary schools are divided into two stages (5 + 3) but at some schools an 8-year continuous course leading to the matriculation exam is offered. In a few places the old 8-year classical gymnasium is still in force. Some schools are based on six years in primary school, offering courses of 6 or 7 years duration. At some schools only the three-year 2nd cycle is offered (gymnasium/lukio). It has a modern language and a mathematics section. For the time being there are parallel forms of school from the fourth year of primary. It is in order to avoid this, that the new basic school has been introduced. As a consequence, the junior level (1st cycle) secondary school will disappear and the common trunk will be nine years (basic school) plus three years (gymnasium).		10-12
5. Special education 5.1. Kuuromyököin- ja sokeainkoulut, etc. (Schools for deaf-mutes and the blind, etc.)	8			Full time	The children are looked after in special boarding-schools and in special classes inside the communal school system. There are also four State boarding-schools for children with great mental defects, and 20 boarding-schools (both public and private) for mal-adjusted children.	Special education Primary/ Secondary	1-8
5.2. Apukoulut (Auxiliary schools)	8			Full time	There are special classes for the mentally handicapped children inside the communal school system.	Special education Primary/ Secondary	1-8

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	D.E.C.D. Classification	
						Type of Education (7)	Years of Study (8)
6. Kansanopistot-järjestykselliset (Folk high schools/Academies)	1	Finished compulsory school. Age: 16 years	The courses give access to the folk academies and various other schools	Full time	The Danish Parson Grundtvig was the founder of the folk high schools in Finland. The pupils are usually older than 16 years. The schools are residential. The principal branches of education are literature, history and sociology. The schools are run by cultural or youth organisations or various Christian associations. By far the greatest part of the pupils come from the country.	General Secondary (a)	Variable
6.1. Kansanopistot (Folk high school)							
6.2. Kansankorkeakoulu (Folk academy)	1-2	Finished a course at a folk high school or similar education. Minimum age: 17 years	The courses may give admission to further schooling where the intermediate school certificate is generally required	Full time	The courses are adapted to the wishes of each pupil. At some of the schools the intermediate school certificate may be granted. At some of the Academies there are two-year courses for education of youth leaders.	General Secondary (a)	Variable
7. Aikuiskasvatus (Adult Education)							
7.1. Iltaopiskoulu (General secondary school - evening classes)	3	Compulsory school	Leaving certificate	Evening classes	There are 3 year courses, both for the intermediate school certificate and the matriculation exam.	General secondary (a/b) (Complementary education)	Variable
7.2. Työväenopistot (Workers' evening schools)	Variable	Age: 16 years	Variable	-	A variety of courses are offered. Education is given in practical as well as theoretical subjects. More than 200 institutions offer such courses.	General/Technical Secondary (b) (Complementary education)	Variable
7.3. Kirjeopistot (Correspondence courses)	Variable	-	-	-	Practical and theoretical courses are offered. The schools are private.	"	Variable

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	D.E.C.D. Classification	
						Type of Education (7)	Years of Study (8)
8. Ammatikoulut (Technical and vocational education)							
8.1. Maatalousoppilaitokset (Agricultural schools)							
8.1.1. Maamies- ja pienviljelijäkoulut (Farmers' school)	1	Compulsory school Age: 17 years	Leaving certificate giving access to the Institute of Agriculture	Full time	The courses comprise six months at school and five and a half months practical work. The schools are residential.	Technical Secondary (b)	9
8.1.2. Maanviljelyskoulut (Agricultural schools)	2	Compulsory school Age: 17 years	The title "maanviljelysteknikko" is obtained giving access to the "maatalousopisto" (Institute of Agriculture)	Full time	The first year is 2/3 practical, 1/3 theoretical teaching. The second year is similar to the course at the farmers' school. "Isäntäkoulut" are 1½ year residential schools offering similar courses.	Technical Secondary (b)	9-10
8.1.3. Maatalous- teknilliset koulut (Agricultural technical schools)	2	Compulsory school Age: 17 years	Leaving certificate giving access to the "Maatalousopisto"	Full time	The students learn to handle agricultural machines.	Technical Secondary (b)	9-10
8.1.4. Maatalousopistot (Institute of Agriculture)	29 months	Age: 19 years, completion of farmers' school or the intermediate school plus one year of practical experience, or two years in another agricultural school	The title "Agrologi" is obtained	Full time	A two-year course is also given at "Maatalouskerho-opisto" giving the title "maatalouskärhoteknikko" (counsellor). There are several agricultural institutes either private or State owned. In some of them, instruction is given in Swedish language. Duration of studies is variable. The title "maatalousteknikko" is obtained at the end of the shorter course.	Technical Secondary (b)	10-12
8.1.5. Maanviljelijäopistot (Institute of farmers)	19 months	Age: 19 years, completion of farmers' school	The title "maatalousteknikko" is obtained	Full time		Technical Secondary (b)	10-10½/11

8.2. Kotieläinhoidokoulut (Schools for stockbreeding)							
8.2.1. Karjanhoitokoulut (Stockbreeding schools)	1-1½	Compulsory school Age: 17 years	Leaving certificate giving access to agricultural institutes	Full time	The education is both practical and theoretical. An institute of stockbreeding offers more advanced courses for pupils with the intermediate school certificate giving the title "karjatalousteknikko".	Technical Secondary (b)	9-9½
8.2.2. Karjanhoidon erikoiskoulut (Special schools in the field of stockbreeding)	1-1½	Compulsory school Age: 17 years	Leaving certificate giving access to agricultural institutes	Full time	There are schools offering courses in the breeding of horses, poultry, pigs, furry animals, and also courses for control assistants and smith's work.	Technical Secondary (b)	9-9½
8.2.3. Maitotalousoppilaitokset (schools of dairying)	8 months and 20 months	Compulsory school 15 months practical experience	8 months: assistant dairy-man or maid 20 months: dairy-man or maid	Full time	At the Institute of dairying there is a two-year continuation course giving the title "meijeriteknikko".	Technical Secondary (b)	9 or 9-10
8.3. Puutarhaoppilaitokset (Horticultural education)							
8.3.1. Puutarhakoulut (Horticultural schools)	1	Compulsory school Age: 16 years	Leaving certificate	Full time		Technical Secondary (b)	9
8.3.2. Puutarhukoulut (Advanced Horticultural schools)	1	Finished horticultural school (8.3.1.) and 1 year work or compulsory school and 2 years practical experience	The title "puutarhuri" is obtained, giving access to the institute of Horticulture	Full time		Technical Secondary (b)	10

## FINLAND

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	D.E.C.D. Classification

8.3.3. Puutarhaopistot (Institute of Horticulture)	1½	Completion of advanced horticultural school (8.3.2.) and thereafter 6 months practical experience	The title "hortonomi" is granted	Full time	There are various branches; a teacher's training course is of three months supplementary duration. See Teacher Training.	Technical Secondary (b)	11-11½
8.4. Metsätalouseläimätkokset (Forestry schools)							
8.4.1. Metsäkoulut (Forestry schools)	Max. 1 year	Compulsory school Age: 17 years.	Leaving certificate	Full time		Technical Secondary (b)	9
- Metsätyönohjaajakoulut (Forest foreman school)							
- Metsätyökoulut (Forest workers' school)							
- Metsäkonekoulut (Forest machine school)							
- Metsäkoulut (Forest owners' school)							
8.4.2. Metsäopistot (Forest technician school)	2	Compulsory school plus 12 months of practical experience	The title "metsäteknikko" is obtained	Full time		Technical Secondary (b)	9-10
8.4.3. Puutalousopisto (Forest and wood technician school)	2	"	"	"		"	9-10
8.5. Kalastusalan koulut (Education for fishermen)	7 months	Compulsory school Age: 16 years	Leaving certificate	Full time		Technical Secondary (b)	9
8.6. Teknilliset oppilaitokset (Technical courses)							

## FINLAND

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	O.E.C.D. Classification	
						Type of Education (7)	Years of Study (8)
8.6.1. Teknilliset koulut (Technical schools). Courses: machinery electrical building wood chemistry paper textile	3	Primary school leaving certificate and two years of practical experience. Applicants who have finished secondary or vocational education need less practical experience.	Qualifications as foremen, tracers, designers, constructors, draughtsmen, etc. are obtained. After two years at a technical school, the student may be admitted to a technical college.	Full time	The schools are mostly maintained by the State. Certain communal and private schools have a two-year syllabus. Communal and privately owned technical schools receive State aid.	Technical Secondary (b)	Usually 9-11
8.6.2. Teknilliset opistot (Technical colleges). Courses: machinery electrical building wood chemistry paper textile	4	Secondary school (intermediate school) leaving certificate and 16 months' practical experience. Applicants with some technical education may also be admitted.	College engineer giving admission to the corresponding course at Institutes of Technology.	Full time	For applicants with the matriculation examination the practical work is reduced to 12 months and special classes providing 3-year crash courses are available. Communal and privately owned technological colleges receive State aid.	First 3 Years: Technical Secondary. Higher non-university (technology)	10-13
	3	Matriculation examination and 12 months practical work.	"	Full time	Crash course	Higher non-university (technology)	13-15
8.7. Yleiset ammat- tikoulut (General vocational schools)	1-3	Completion of compulsory school Age: 15 years. Some courses require special qualifications, such as practical experience, the intermediate school certificate etc.	The school gives a basic training for trade occupations. Many pupils, however, continue their training in technical schools. Some vocational schools give further education, too.	Full time	The first year: 50 per cent practical training. The second year: 60 per cent practical training. The third year 75-80 per cent practical training. The most common courses are: metalwork, machine repairing, electrical contracting, building, wood-working, sewing, textile, shoe making and leather work, catering, restaurant work, baking, industrial food processing hair-dressing laboratory work	Technical Secondary (b)	9-10/ 11/12

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	OECD Classification	
						Type of Education (7)	Years of Study (8)
8.8. Erikoisalojen ammatikoulut (Specialised vocational schools)					In the statistics the general vocational schools are divided into the following: Central vocational schools, owned by the State, Vocational schools owned by federations of communes, Vocational schools owned by one commune.  In addition to the formal education given at the general vocational schools there are evening courses.		
8.9.1. Valtion rautateiden konepajakoulut (State Railway's workshop schools)	3-4	Compulsory school Age: 16 years Entrance examination	Leaving certificate	Full time		Technical Secondary (b)	9-11/12
8.8.2. Teollisuuslaitosten ammatikoulut (Industrial enterprises' vocational schools)	2-4	Compulsory school Age: 15 years	Skilled worker	Full time or part time	Young workers are taught a craft on the basis of an indenture made with the enterprise. Usually, the first year is a full-time course, and thereafter the trainee does production work in addition to his theoretical education.	Technical Secondary (b)	9-10/11/12
8.8.3. Käsityö- ja palveluammatit (Handicraft and service - vocational schools)	2-3	Compulsory school Various requirements as regards practical experience	Leaving certificate	Full time or part time	Courses are available for cutters, tailors, skilled mechanics, hair-dressers, etc.  Some of the schools give courses for apprentices i.e. the pupils work as well as attend school.	Technical Secondary (b)	9-10/11

## TEACHER'S TRAINING

40

Teachers	Place of Training	Length of Study (in years)	Other Information
1. Lastentarhat (Pre-primary school)	Lastentarhanopettajaseminaarit (teachers' training college for pre-primary teachers)	2	The intermediate school certificate or the matriculation exam. is required. In addition three months of practical experience and the candidates must not be less than 19 years old. In fact, more than two thirds of the applicants admitted have their matriculation exam. The future pre-primary teachers are advised to take courses in child care and housecraft and to hold a university degree in education or psychology.
2. Kansakoulut (Primary school)	Kansakoulunopettajaseminaarit (teachers' training school)	3	The matriculation examination is required. Applicants have to sit an entrance test. Until 1968 (and with certain exceptions until 1972) the training was based on the intermediate school certificate and lasted four years. At that time candidates with the primary school certificate could attend a two-year preparatory course, before starting the four-year course. The matriculation exam is required. Applicants have to sit an entrance test. Until 1968 the course was of two years duration. In addition the colleges provide in-service training for teachers and research facilities in education. Of the five established colleges, three work in collaboration with a university in Oulu, in Jyväskylä and in Joensuu.
2.2. Kansalaiskoulut (Civic school - Continuation school)	As above	1-2	Special training courses are arranged in above mentioned institutions (2.1) for prospective teachers in civic schools and special classes (handicapped children). The entrance requirements are usually the certificate from a teachers' training school or college or from a university or from a higher institution for vocational training. The duration of the course depends on the basic training.
3. Oppikoulut (General secondary schools) General subjects	University	3-4 5-6	To become an intermediate school (1st cycle) teacher (nuorempi lehtori), the exam. of candidate in human or natural sciences (B.A. or B.Sc.) must be passed. A secondary school (2nd cycle) teacher (vanhempi lehtori) must pass a higher exam. that of candidate of philosophy (M.A.) Graduates must be given practical experience in the particular secondary schools for teachers' training (normaalilyseo). Here they follow a teaching course lasting two terms. During this course an exam. in school management and a university exam. in education must be taken. Before going to the "normaalilyseo", the future teacher must attend a preparatory course in pedagogics.
Gymnastics	University	3	At the universities of Helsinki and Jyväskylä a 3-year course in gymnastics is offered qualifying teachers in gymnastics and sports.

## TEACHER'S TRAINING

41

Teachers	Place of Training	Length of Study (in years)	Other Information
Drawing	Taideteollinen oppilaitos (School of applied art)	4	At the school of applied art there is a section for training of teachers in drawing. See 8.16.2.
Music	Sibelius Akatemia	4-5	There is one of the departments at the Academy for training of teachers in music (see 8.16.3). After four years the certificate as teacher in music may be obtained. A higher exam. may be passed after one more year of study.
4. Ammattikoulut (Vocational and technical schools)	Ammattikoulujen Opettajainopisto (Institutes for vocational teachers)	1-2 (Sandwich course)	Future vocational and technical teachers must first complete their professional training (engineer, technician, etc.) and thereafter complete teacher training. To meet the latter need, training facilities are provided at Hämeenlinna and Jyväskylä. Courses for teachers in metal work, construction, woodwork, electricity, food service for canteens, textiles and hairdressing are arranged, and courses in social sciences, etc. are also offered.
5. Kotiteollisuuskoulut (Home industry school)	Kotiteollisuusopettajaopisto (Home industry teacher training colleges)	1-3	The candidates must be at least 18 years old, have the intermediate school certificate and complete a one year course at home industry schools.
6. Kotitalousoppilaitokset (Training college for teachers in home economics)	Kotitalousopettajaopisto (Training colleges for teachers in home economics)	4-5	For students with the intermediate school certificate: (a) one year in a rural homemaking school (b) one year practical work (supervised) (c) two and a half years in the college; altogether 4-5 years. For students graduated from high schools (matriculation examinations) (ylioppilas): (a) half a year (4-5 months) in a housekeeping school (b) one year practical work (c) two and a half years in the college. Altogether 4 years.
7. Puutarhakoulut (schools of horticulture)	Puutarhaopisto (Institute of Horticulture)	2	The candidates must have a basic horticultural education before entering the school. The teacher training is a three month prolonged course of the regular advanced horticultural course, see 8.3.3.

						Type of Education (7)	Years of Study (8)
1st cycle Normalform	3	Minimum age: 10 Completion of primary school (Grundschule) and having passed entrance course			Hauptschulen or Realschulen. There is also a distinction between a) types of schools giving access to all fields of higher education and b) types of schools giving access only to certain branches of education.  1st cycle education is provided in the following types of establishments described below: viz. - 4.1.1. 4.1.2. 4.1.3.		5-7
2nd and/or 3rd cycle Normalform							
4.1.1 Altprachliches Gymnasium (Classical type)	3 + 3	Completion of 1st cycle	Abitur (secondary leaving certificate) giving access to all branches of higher education (allgemeine Hochschulreife)	Full time	Emphasis is on teaching of classical languages (in general Latin and Greek) in addition to English and French.	General secondary (a)	8-13
4.1.2 Neusprachliches Gymnasium (Modern language type)	3 + 3	See 4.1.1	See 4.1.1	Full time	Emphasis is on teaching of modern languages (in general English or French) in addition to Latin.	General secondary (a)	8-13
4.1.3 Mathematisch-naturwissenschaftliches Gymnasium (Mathematics and science types)	3 + 3	See 4.1.1	See 4.1.1	Full time	Emphasis is on teaching of mathematics, physics and natural sciences, in addition to two foreign languages.	General secondary (a)	8-13
4.1.4 Wirtschafts-wissenschaftliches Gymnasium (Economic science type)	3 or 6	Completion of 1st or 2nd cycle of types 4.1.1, 4.1.2 or 4.1.3	See 4.1.1	Full time	In Bavaria there are several schools of this type which have 9-year courses (emphasis on economics in addition to two foreign languages).	General secondary (a)	8 or 11-13 (5-13)
4.1.5 Sozial-wissenschaftliches Gymnasium (Social science type)	3 or 6	See 4.1.4	See 4.1.1	Full time	Schools mainly for girls. Length of course varies (Emphasis on social science in addition to two foreign languages).	General secondary (a)	8 or 11-13

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	O.E.C.D. Classification	
						Type of Education (7)	Years of Study (8)
4.1.6 Musisches Gymnasium (Fine arts and music type)	3 or 6	Completion of 1st or 2nd cycle of the other types	See 4.1.1	Full time	In certain Länder these are branches of other types of Gymnasium.	General secondary (a)	8 or 11-13
4.2 Wirtschafts-Gymnasium (General secondary school - economics type)	3 or 6	Leaving certificate of Realschule or equivalent	Abitur (secondary leaving certificate) giving access to certain sectors of higher education (Fachgebundene Hochschulreife) - here to faculties of economic science and in some cases to faculties of social science	Full time	Formerly Wirtschaftsoberschulen. Those who pass the Abitur in these institutions can acquire the Abitur giving access to all branches of higher education by taking complementary exams (Ergänzungsprüfungen).	Technical secondary (a)	8 or 11-13
4.3 Gymnasium für Frauenbildung (Schools for girls)	3 or 6	Completion of 1st or 2nd cycle of the other types	Abitur (secondary leaving certificate) giving access to certain branches of higher education (Fachgebundene Hochschulreife) - here to teacher training colleges	Full time	Formerly Frauenoberschule. Those who pass the Abitur in these institutions can acquire the Abitur giving access to all branches of higher education by sitting complementary exams (Ergänzungsprüfungen). These schools are found only in some Länder.	Technical secondary (a)	8 or 11-13
4.4 Abendgymnasien (Gymnasium-evening course)	Minimum of 6 semesters	Minimum age 19, Abschlusszeugnis (leaving certificate) of Hauptschule and of vocational training course or 3 years in employment	Abitur (secondary leaving certificate) giving access to all branches of higher education (allgemeine Hochschulreife)	Part time at least 17 hrs a week	These schools are for young people and adults who have left school and who wish to prepare for entrance to higher education (further education). They must exercise a profession during their studies except for the last 1½ years when they may receive a grant. Before admission, candidates must attend a preparatory course of 1 semester.	General secondary (a) (complementary education)	-

						Type of Education (7)	Years of Study (8)
4.5 Kolleg (Institute of general education preparing young workers for higher education)	2½	Minimum age 19, Abschlusszeugnis (leaving certificate) of Realschule or equivalent and of vocational training course or 3 years in employment	See 4.4	Full time	These are often residential. Pupils must not exercise a profession during course and usually receive grants.	General secondary (a) (complementary education)	-
5. Technical secondary education							
5.1 Fachoberschule (Secondary technical schools)	2	Leaving certificate of Realschule or equivalent	Fachhochschulreife (leaving certificate) giving access to Fachhochschulen (post-secondary technical colleges)	Full time	These schools were established in 1969 as a result of a 1968 agreement of the Prime Ministers of the Länder. They provide pupils who have completed the Realschule or equivalent, with theoretical and practical training. They are specialized either in technology, economics, social work, designing or other fields of study. The first year is devoted to practical training under school supervision given in special centers or in firms and an introduction to theory within the school (8 to 12 hours a week). The second year of the course is devoted to general and specialized education and is open to those pupils who have successfully completed their apprenticeship and who have leaving certificate of the Hauptschule and of the Berufsaufbauschule (complementary vocational school). In Baden-Württemberg the corresponding institution is the Technisches Gymnasium (technology type). Leaving certificate of the 12th class is Fachhochschulreife; leaving certificate of the 13th class gives access to university in the corresponding fields of study.	Technical secondary (a)	11-12

Teachers	Place of Training	Length of Study (in years)	Other Information
Kindergarten (Pre-primary school)	Fachschulen für Kindergärtnerinnen und Hortnerinnen oder für Sozialpädagogik (Specialized secondary technical schools for Kindergarten teachers)	2 years	Students must have Realschule leaving certificate or equivalent. Instruction is theoretical (psychology, children's literature, hygiene, pedagogics, etc.) as well as practical (drawing, music, gymnastics, modelling, etc.). The final examination is divided into two parts and students are required to sit the 2nd part after a further year (3rd year), teaching.
Schulkindergarten (Pre-primary classes for children of school age)	Höhere Fachschule für Jugendleiterinnen oder für Sozialpädagogik (Advanced technical schools for social pedagogy)	3 years	Students must have Realschule leaving certificate or equivalent and at least two years of practical experience. The final examination is divided into two parts and students are required to sit the 2nd part after a further year (4th year), teaching.
Grundschule (Primary school)	Pädagogische Hochschule (Teacher training college)	6 semesters	Students must have the "Hochschulreife" (certificate giving access to all or some branches of higher education). Studies comprise pedagogics and related subjects (philosophy, psychology, political science, sociology), the subjects taught in the Grundschule. Depending on the regulations of the Länder at least one of these subjects must be chosen by the students for more intense study. The course also includes a practical introduction to teaching. The first state exam is held on completion of course after which students enter the second phase of teacher training. In most of the Länder they now become probationary teachers. Depending on the Länder this period can last from two to four years. During this time the teacher is engaged in active teaching and attends study groups. The second phase of teacher training is terminated by the second state exam (final examination of teacher training). In some Länder the students enter a "Vorbereitungsdienst" (preparation period) after the first state exam which lasts one to two years depending on the Länder. During this period students attend theoretical courses at institutes called "Studienseminar" which do not belong to the teacher training college but are independently controlled by the ministries of education. Moreover they receive a practical introduction to teaching and are engaged to a certain extent in teaching. The second phase is terminated by the second state exam (final examination of teacher training). The number of teaching hours is 28 to 29 a week.

# GERMANY

## TEACHER'S TRAINING

60

Teachers	Place of Training	Length of Study (in years)	Other Information
Hauptschule (Main school)	See above	6 semesters	See above (with the exception of Hesse, where the training of teachers for Hauptschule is the same as that of the teachers for Realschule)
Realschule (Intermediate school)	Universities or specialized institutes	6 to 8 semesters	Studies comprise pedagogics and two teaching subjects of the Realschule and end with the first state exam. Studies also include a practical introduction to teaching. In most of the Länder students enter the Vorbereitungsdiens, as described above, after the first state exam. In general the Vorbereitungsdiens last for 18 months and ends with the second state exam. In some Länder the students become probationary teachers after the first state exam. For detailed information about probationary period see above. In Hamburg and Bremen training of Realschule teachers is the same as that of teachers at Grund- and Hauptschule. In the other Länder teachers of Grundschule and of Hauptschule can get a qualification for teaching at the Realschule by attending additional courses of further education. The number of teaching hours is 24 to 27 a week.
Gymnasium (General secondary school)	Universities	8 semesters	Studies comprise pedagogics and at least two subjects taught in the Gymnasium and end with the first state exam which is followed by the Vorbereitungsdiens lasting in general two years. Teacher training ends with the second state exam. The number of teaching hours is 23 to 24 a week.
Technical and vocational education of all branches (Technology, commerce, agriculture, etc.) Berufsschulen Berufsfachschulen Fachschulen Berufsaufbauschulen Fachoberschulen	University     Fachschule (specialised secondary technical school)	8 semesters	This type of teacher is engaged in teaching of general subjects and theory of vocational subjects. The training of these teachers is divided into three phases: - practical training in private or public enterprises lasting from one to two years. The first part of this practical training is done before the beginning of the courses and the second part is done during the course and must be finished before the first state exam. - university studies last 8 semesters and are terminated by the first state exam. - the following "Vorbereitungsdiens" (preparation period) lasts in general two years and is terminated by the second state exam. The number of teaching hours is between 23 to 27 a week. Instructors are responsible for practical training in vocational schools (technische Lehrer, Werkstatthehrer) and usually have Realschule leaving certificate or equivalent (Fachschulreife) and have passed an examination as a master in handicraft or a technicians certificate and five years of professional experience.

Teachers	Place of Training	Length of Study (in years)	Other Information
Höhere Fachschulen (Advanced technical schools) Ingenieurschulen (Schools for engineers)	University	8 semesters	Teachers have a university degree in the subject they teach e.g. Diplom-Ingenieur and at least five years of professional experience in a senior post.
Sonderschule (School for the handicapped)	Special institutes in universities and teacher training colleges	4 semesters	In general students must have passed at least the first state exam of teacher training for Grund- and Hauptschule and accomplished a practical training at a school for handicapped children. Studies comprise pedagogics for handicapped and end with a first state exam which is followed by practical training or Vorbereitungsdienst depending on the previous training of the student and on existing regulations. In Northrhine-Westphalia there exists an additional possibility of teacher training for the handicapped which starts directly after the Abitur and lasts for 8 semesters. Studies end with the first state exam and are followed by a Vorbereitungsdienst of 18 months after which the second state exam is held. The number of teaching hours is 23 or 24 a week.
Specialized teachers of: Grundschule Hauptschule Realschule Berufsschule	Pädagogische Fachinstitute (Special teacher training institutes)		These institutes train teachers of drawing, painting, handicrafts and home-crafts, music, physical education, typewriting and shorthand. Students must have the Realschule leaving certificate or equivalent. Depending on the Länder the training last two to four years and comprises theoretical and practical instruction and ends with a state exam. These teachers can teach in Grund- and Hauptschulen provided they attend additional courses at the teacher training college.
Higher education (Universities and equivalent)	Universities		<p>- Chairholders (Lehrstuhlhaber)</p> <p>(a) Ordinary professor (Ordentlicher Professor): is responsible for the teaching of his subject</p> <p>(b) Extraordinary professor (Ausserordentlicher Professor): is responsible for teaching of new subjects which are still in their infancy or very specialized disciplines (Lehrstuhlhaber; chairholder).</p> <p>- Middle level staff</p> <p>(c) Head of department and professor: are responsible for special duties in teaching and research and usually relieve the chairholders of some of their tasks.</p> <p>(d) "Ausserplanmässiger Professor": recruited from amongst the Dozenten (or wissenschaftliche Assistenten with "Habilitation") with at least 4 to 6 years service.</p>

Teachers	Place of Training	Length of Study (in years)	Other Information
			<p>(e) "Dozent": the status is acquired through the "Habilitation" after the presentation of an important research paper and delivery of a prepared lecture followed by a discussion (colloquium) before the faculty board. The majority of university teachers (a) - (d) are recruited from amongst this group.</p> <p>(f) Honorary professor: works outside the institutions of higher education but can give lectures or can conduct tutorials on a particular subject.</p> <p>(g) "Akademischer Rat": teacher delegated from secondary education (Studienrat im Hochschuldienst); these members of staff are as a rule responsible for teaching of a preparatory nature.</p> <p>(h) "Lektor": especially with teaching duties in foreign languages.</p> <p>- Junior staff</p> <p>(i) "Wissenschaftlicher Assistent": in general they must hold their doctorate or in some subjects the diploma; they generally continue their studies and work towards the "Habilitation". Their posts are limited in time. They generally assist chairholders in teaching and research work. The greater part of university teaching staff is recruited from amongst them. Their position is in a phase of transformation at present.</p>

(May 1971)

Compulsory schooling: 9 years, from the age of 6 to 15

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	O.E.C.D. Classification	
						Type of Education (7)	Years of Study (8)
1. <u>Pre-primary education</u> 1.1. Yōchien (pre-primary schools)	1-3	3, 4 or 5 years old		full time	Pre-primary schools admit children aged 3, 4 or 5 and provide them with 3, 2 and 1 year courses respectively. The majority of the kindergartens are privately run, but under the supervision of education authorities. Apart from kindergartens there are day nurseries (Hioku-Jō), supervised by the Welfare Authorities. These day nurseries cater for those infants aged 0 to 5 and 6 who are taken care of by institutions till their entrance to elementary school. Most of the day nurseries are run by local governments.	Pre-primary	-
2. <u>Primary education</u> 2.1. Shōgakkō (primary schools)	6	6 years old	Leaving certificate giving access to 1st cycle or short course secondary schools	full time	In primary schools most of the teachers are assigned to a single class of a particular grade and teach the children in most subjects. The other teachers are specialists in fine arts, music, physical education, home-craft, etc.	Primary	1-6
3. <u>General secondary education - 1st cycle</u> 3.1 Chūgakkō (1st cycle secondary schools)	3	Leaving certificate from a primary school. At the municipal 1st cycle secondary schools there is no selection procedure, while at the national and private ones entrance exams are necessary.	Leaving certificate giving access to 2nd cycle secondary schools, on a competitive basis; admission is also granted to technical colleges and to miscellaneous schools.	full time	All children must go on to a 1st cycle secondary school to complete the nine years of compulsory schooling. Instruction is here departmentalised to a large extent and the majority of teachers are specialists in one or two subjects.	General secondary (a)	7-9

						Type of Education (7)	Years of Study (8)
4. General secondary education 2nd cycle							
4.1. Kotogakko (2nd cycle secondary schools) Full-time Part-time Correspondence Course	3 4 or + 4 or +	Local 2nd cycle secondary schools select their entrants on the basis of the results of the achievement test set by the local authorities and the reports from 1st cycle secondary school principals. National and private schools select their entrants on the basis of an entrance examination set by individual institutions and the reports from 1st cycle secondary school principals.	35 class hours count for 1 credit. The minimum number of credits required for the completion of any 2nd cycle secondary school course is 85. The leaving certificate gives access to institutions of higher education (universities and junior colleges) on a competitive basis.	variable	After World War II, the intermediate school and the vocational school were unified into a single 2nd cycle secondary school. The courses offered may be classified into general and specialised courses. Specialised courses are further classified as vocational and non-vocational ones. Vocational courses include: Agriculture, Fishery, Technical Commercial, Home economics Nursing, etc. Non-vocational courses include: Science - Mathematics Music Fine Arts, etc. There are 2nd cycle secondary schools providing only the general course (even in the general course some specialisation is possible because of optional subjects); while other schools offer both the general course and various specialised courses. Some of the schools are specialised vocational schools offering training in one or more fields. The revised Course of Study which will become effective in 1973, specifies that all students, whatever courses they are enrolled in must cover the following fields of study: Japanese language, Social studies, Mathematics, Science, Health and physical education, Fine arts, Homecraft (girls only). In a report, submitted in 1967, on the diversification of vocational education in 2nd cycle secondary school, the ..... Additional requirements must be met for some of the courses.	Certificate of technician for those who have passed examina- tions	full time		Technical " " Teacher tr. Technical " "	Variable
6.2. Vocational schools.					These centres are under the auspices of the Ministry of Labour. Subjects and hours of training are variable depending on the courses.	Technical secondary (a) or (b)	Variable
7. Shakai Kyoiku Social Educa- tion					Social education in Japan is carried out in various forms. Pupils are taught in classes, seminars, or meet- ings. Correspondence courses, reading rooms and other teaching aids are available for individual pupils. Public halls (Kominakan) which are provided by the municipalities, or the national and local youth centres (Seinen-No-Ie) are used for group learning. Universities and schools often also open courses for social education with a view to providing lifelong education	Comple- mentary	Variable
-Individual Courses							
7.1. Correspondence courses	6 - 24 months	Variable	Variable	part time	Correspondence courses follow a set syllabus of studies run by schools, universities or other institutions. The Ministry of Education gives appro- val to those which are recommendable from the viewpoint of social education. Courses are varied, including law, practical training for business, short- hand, electrical engineering, construc- tion, cooking, languages, etc.		

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	O.E.C.D. Classification	
						Type of Education (7)	Years of Study (8)
7.2. Telecommunication programme	Variable	Variable	Variable	part time	There are various television or radio programmes for social education. Some programmes aim at educating a certain age group, and some programmes are for improvement of vocational skills. Languages are taught through these media too. These programmes play an important role in teaching on an individual basis. NHK (Japan Broadcasting Corporation) makes most of these programmes, but some commercial television and some shortwave commercial radios also provide educational programmes.		
- Group Learning							
7.3. Youth Classes	About 1 year	Mostly those between the age of finishing compulsory school and 25 years old.	Variable	part time	The aim of youth classes is to promote working youths' knowledge and vocational skill and management and to increase their general education.		
7.4. Parents classes	Variable	Variable	Variable	part time	The aim of these classes is to guide parents in the bringing up and education of their children.		
7.5. Women's classes	Variable	Variable	Variable	part time	Classes for women in subjects closely related to their everyday life. These subjects include family life, educating children at home, citizenship professional life, etc.		
7.6. Classes for elderly people	Variable	Variable	Variable	part time	Classes aim at instructing elderly people in social behaviour and in how to spend their leisure time. Subjects taught in these classes include health and hygiene, hobbies, general knowledge, professional skills, etc.		
8. Technical education				full time	Technical colleges came into existence in 1962; most of them are run by the State. Whereas a credit system is applied at the universities and colleges, the number of class hours is applied at the technical colleges. A full five-year course will contain at least 6,545 class hours distributed between general education (humanities, natural sciences and social sciences, foreign languages, physical education) and professional education.	The first 3 years: Technical secondary (a) The last 2 years: Higher non university (Technology)	10-12 13-14
8.1. Kōtō-senmon-gakko (technical schools)	5	Finished 1st cycle secondary school. Admission is obtained usually on a competitive basis. The selective procedure is similar to that described for entrance to 2nd cycle secondary school. (see above).	Technician. Certificate holders may apply for admission to a university.				

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	D.E.C.D. Classification:	
						Type of Education (7)	Years of Study (8)
8.2. (Merchant navy college)	5½	See 8.1.	Staff of merchant navy	full time	Merchant navy colleges came into existence in 1967; all of them are run by the State. The system of credits is applied also in these colleges. A full five and half years course will contain at least 5,950 class hours; distributed between general education and professional education, and 12 months training at sea.	See 8.1.	10-14½
9. Higher education (Universities and junior colleges)		The universities and the junior colleges require for admission the completion of 2nd cycle secondary schooling or its equivalent. Practically all the universities and junior colleges limit the number of students to be admitted each year. Consequently admission to these institutions is obtained on a competitive basis. In general, students are selected mainly by means of the entrance examination set by each institution. The 2nd cycle secondary school record is also taken account of. A growing number of institutions (153 universities, 260 junior colleges in 1970) select a certain proportion (up to 20%) of the entrants solely on the basis of the recommendations of school principals. A small		Usually full time but evening courses do exist	There are nearly 100 universities and 500 junior colleges in Japan. In universities and junior colleges credits are uniformly defined. A lecture class of one hour a week, requiring two hours of student preparation and of 15 weeks duration, yields one credit. A seminar class of two hours a week requiring one hour of student preparation and of 15 weeks duration, yields one credit, as do laboratory classes of the same duration, requiring 3 hours work per week. Besides the regular courses: advanced courses, short-term courses and correspondence courses are offered at some of the universities and junior colleges. Classification of these courses, by level or by field of study may be difficult. Usually the correspondence courses are of longer duration than the regular ones (cf. 2nd cycle secondary schools), but lead to a similar examination or degree.

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	O.E.C.D. Classification	
						Type of Education (7)	Years of Study (8)
9.1. Tanki-daigaku (Junior colleges)	2-3	number of institutions select all entrants solely on the basis of the 2nd cycle secondary school records of applicants. More than 90% of the students attend private junior colleges; there also exist colleges maintained by the local authorities or by the State.			2-year course: The student must obtain 62 credits of which 12 are achieved in general education and two in physical education. 3-year course: 18 credits are required in general subjects and 3 credits in physical education and the total needed is 93 credits. Neither of the courses qualifies for a first degree (Gakushi) but the credits acquired at junior colleges may be counted as part of the credits leading to this degree. About 75% of the students attend private universities. In addition to these, there are universities run by the local authorities or by the State. Great efforts have been made to standardise the quality of the universities throughout the country, but, differences still exist. Tokyo alone has one-third of universities and one-half of the students. Students tend to try to enter top-ranking universities and this pressure has created the so-called "iron-student", i.e. students who having failed to pass the entrance examination for the top-ranking schools, spend years cramming for a re-sit rather than enter an inferior institution. In the universities, students study subjects of general education (36 credits) in the following three fields: humanities, social science and natural science), foreign languages (8 credits), health and physical education (4 credits) and professional subjects (76 credits).	Higher non-university	13-14 or variable
9.2. Daigaku (Universities)						Higher non-university	13-15 or variable

						Type of Education (7)	Years of Study (8)
			Gakushi (First degree) usually 4 years, medicine and dentistry 6 years		"Gakushi" is thus obtained after 4 years of study and the accumulation of 124 credits. Exception is made for the faculties of medicine and dentistry where the students must complete 2 years of general education (64 credits) followed by four years of professional training.	Higher university	
		First degree	Shushi (post graduate diploma) Minimum: 2 years		"Shushi" requires 30 additional credits, a research thesis and a final examination. There is no post-graduate diploma for medical studies, but doctorates may be obtained. Graduate Schools ("Daigakuin") do not exist at every university.	Post-graduate	
		First degree	Hakushi (doctorate) Minimum: 5 years.		"Hakushi" is awarded after the acquisition of at least 50 credits after the first degree, defence of a research thesis and a final examination.	Post-graduate	
10. <u>Other forms of education</u>					In addition to State and private types of education for which statistical data are collected and published regularly there are also many other training possibilities organised by public and private bodies.		

A more detailed analysis may be made on the basis of the following list showing the existing faculties in the universities:

A more detailed analysis may be made on the basis of the following list showing the existing faculties in the universities:

Teachers	Place of Training	Length of Study (in years)	Other Information
1. Pre-primary	School for training of teachers in pre-primary schools (Cf. "Miscellaneous schools") and institutions of higher education.	2 4	<p>Certificate requirements vary with school level. Teacher certificates are classified as regular and "deputy" teachers certificates. The former are sub-divided into first and second class certificates. Teacher certificates for pre-primary and primary schools cover all subjects; those for 1st cycle and 2nd cycle secondary schools are for specialist subjects. In order to become school principals, teachers must hold first-class certificates. Those who have a "deputy" teachers certificate can be assistant teachers and the certificate is honoured for three years only.</p> <p>Teachers seeking higher class certificates must earn the additional credits and must have served for the prescribed number of years with good records as school teachers. The required credits may be acquired through in-service training (e.g., correspondence and other off-campus courses) or by attending regular university courses.</p> <p>"Deputy teacher" certificate: leaving certificate from the 2nd cycle of secondary school (or the equivalent) and passing educational personnel examinations conducted under prefectural auspices.</p> <p>Second-class certificate: junior college graduates or the equivalent.</p> <p>First-class certificate: University graduates (Gakushi) or the equivalent.</p>
2. Primary school	Institutions of higher education	2-4	<p>The majority of the primary school teachers are trained at four-year teacher training courses in national universities. Others are trained at four-year or two-year courses in a small number of local and private institutions of higher education.</p> <p>Deputy teacher's, second-class and first-class certificates are obtained on the same basis as for pre-primary teachers.</p>
3. Secondary school	Institutions of higher education		<p>The certificates for 1st cycle and 2nd cycle secondary school teachers are available for all students who have acquired the minimum number of credits in each of the following subjects:</p> <p>General education Teaching subjects Professional subjects.</p>
3.1. 1st cycle		2-4	<p>Certificates (deputy, second-class and first class) are granted on the same terms as for primary school and pre-primary teachers.</p>
3.2. 2nd cycle		4 6	<p>Deputy Certificate: junior college graduates or the equivalent. Second-class certificate: university graduates (Gakushi) or the equivalent. First-class certificate: graduates from the post-graduate course of a graduate school.</p>

Teachers	Place of Training	Length of Study (in years)	Other Information
4. Special schools	Institutions of higher education	2-4	In 1966, the first graduate school in teacher training was set up in Tokyo and in 1968, a similar school was established in Osaka. The aims of these graduate schools in teacher training are:
5. Other schools	Special institutes	3	- to train teachers and researchers in the colleges on the subjects taught in primary and secondary schools;
6. Institutions of Higher Education (including technical colleges)	Universities	Variable	- to train top teaching staff at the compulsory education level; - to provide school teachers with opportunities for systematic in-service training and research. In 1970-71, 46 national teacher training faculties provided courses for the training of special school teachers. There exist national training institutes for nurse teachers. The grades of academic staff are: Professor Assistant Professor Lecturer Assistant. The qualifications required are stipulated by a Ministry of Education Decree. In the case of a professor for instance, he should satisfy one of the following requirements: - hold a doctorate; - have published research recognised to be equivalent to a doctorate; - have experience as an assistant professor at a university, and published research which would particularly qualify him for the post. University staff have an obligation by law to concentrate their efforts on their duties. However, they may carry out other educational activities if these do not interfere with their university duties.
